QUARTERLY REPORT

From The Desk Of The Chairman

Dear Shareholders,

RESULTS FOR THE 9 MONTHS OF 2014

We are pleased to announce that PPB Group revenue increased by 15% to RM2.77 billion for the nine months of 2014 primarily driven by higher revenue generated from the flour and feed milling and grains trading segment. Most of the other businesses also recorded growth in revenue.

The Group recorded 2% marginally lower profit before tax of RM732 million compared with RM748 million in the same period last year due mainly to lower profit contribution from PPB's associate, Wilmar International Limited (Wilmar) of RM443 million against RM546 million previously.

Profit for the period under review reduced to RM658.1 million compared with RM711.2 million in 2013. Accordingly, earnings per share for the period ended 30 September 2014 declined to 53.59 sen compared with 59.21 sen achieved in the same period last year.

From The Desk Of The Chairman (Cont'd)

PROSPECTS FOR 2014

In Malaysia and Asia generally, domestic demand will remain the key driver of economic growth for this financial year.

The Group's flour and feed milling, consumer products, film exhibition, farm and bakery businesses are expected to perform well and will be supported by stronger domestic consumption during the year-end festive season. The environmental engineering division's on-going projects together with finalisation of completed project accounts will contribute positively in the last financial quarter. The property development division is expected to maintain its contribution to the Group.

While the Group's core businesses are expected to perform well in this financial year, its overall consolidated financial results will continue to be contingent on Wilmar's business performance.

A. Financial Reporting Standard (FRS) 134 - Paragraph 16

A1. Accounting policies

The interim financial statements of the Group have been prepared in accordance with the requirements of Financial Reporting Standards (“FRS”) FRS 134 - Interim Financial Reporting and Chapter 9, Part K of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad (“BMSB”).

The accounting policies and methods of computation used in the preparation of the interim financial statements are consistent with those used in the preparation of the audited financial statements for the financial year ended 31 December 2013 except for the adoption of the following Amendments to FRSs and Issues Committee Interpretations (“IC Interpretation”) that are effective for financial periods beginning on or after 1 January 2014 :-

Amendments to FRS 10, FRS 12 and FRS 127	Investment Entities
Amendments to FRS 132	Offsetting Financial Assets and Financial Liabilities
Amendments to FRS 136	Recoverable Amount Disclosures for Non-Financial Assets
Amendments to FRS 139	Novation of Derivatives and Continuation of Hedge Accounting
IC Interpretation 21	Levies

The adoption of the above Amendments to FRSs and IC Interpretation does not have any significant financial impact on the Group.

Malaysian Financial Reporting Standards (“MFRS”)

On 19 November 2011, the Malaysian Accounting Standards Board (“MASB”) issued a new approved accounting framework, Malaysian Financial Reporting Standards (“MFRS”).

The MFRS framework is to be applied by all entities other than private entities for annual periods beginning on or after 1 January 2012, with the exception of entities subject to the application of MFRS 141 - Agriculture and IC Interpretation 15 - Agreements for Construction of Real Estate, including the entities’ parent, significant investor and venturer (“Transitioning Entities”).

Transitioning Entities are allowed to defer adoption of the MFRS framework and continue to use the existing FRS framework until the MFRS framework is mandated by the MASB.

The Group falls within the definition of Transitioning Entities and has opted to defer adoption of the MFRS framework.

According to the announcement made by the MASB on 2 September 2014, all Transitioning Entities shall adopt the MFRS framework and prepare their first MFRS financial statements for annual periods beginning on or after 1 January 2017.

The Group will adopt the MFRS framework and will prepare its first set of MFRS financial statements for the financial year ending 31 December 2017. In presenting its first set of MFRS financial statements, the Group will quantify the financial effects arising from the differences between MFRS and the currently applied FRS. The majority of the adjustments required on transition are expected to be made retrospectively, against opening retained earnings of the Group. Accordingly, the financial performance and financial position of the Group as presented in the financial statements for the year ending 31 December 2014 could be different if prepared in accordance with MFRS.

B1. Analysis of performance for the financial period to-date

Group revenue increased by 12% to RM928 million in 3Q2014 and 15% to RM2.77 billion for 9M2014 compared with RM830 million in 3Q2013 and RM2.41 billion for 9M2013 respectively. The increase was mainly from the flour and feed milling, and grains trading segment, most of the other segments also recorded growth in revenue.

The Group registered profit before tax of RM366 million in 3Q2014, 25% higher than the RM293 million in 3Q2013. Higher profits were mainly derived from the flour and feed milling, and grains trading segment. For 9M2014, the Group recorded 2% marginally lower profit before tax of RM732 million compared with RM748 million in the same period last year. This was due mainly to lower profit contribution from an associate, Wilmar International Limited ("Wilmar").

Notes (Cont'd)

Flour and feed milling, and grains trading

Revenue increased by 13% to RM588 million in 3Q2014 and 16% to RM1.75 billion for 9M2014 compared with RM520 million and RM1.51 billion respectively in the corresponding periods last year. Higher flour sales volume in Indonesia, Vietnam and Malaysia coupled with the increased animal feed sales volume contributed to the growth in segment revenue for 3Q2014 and 9M2014.

The segment profits increased significantly to RM76 million in 3Q2014 and RM164 million for 9M2014 mainly due to the favourable grains trading performance, higher sales volume of flour and animal feed as well as the improvement in net foreign exchange translation positions.

Marketing, distribution and manufacturing of consumer products

The segment registered a 7% growth in revenue to RM113 million in 3Q2014 and a 13% growth to RM337 million for 9M2014 compared with the same periods last year. The enlarged distributorship granted for an agency product since August 2013 and improved sales from the other existing agency products contributed to the growth in revenue.

In line with revenue growth as well as improved sales of agency products with better margins, segment profit rose 20% to RM7.6 million in 3Q2014 and 33% to RM23 million for 9M2014.

Film exhibition and distribution

Revenue was RM89 million in 3Q2014 and RM275 million for 9M2014, an increase of 9% and 8% respectively compared with the same periods last year. This was mainly due to improved cinema collections from blockbuster movies released for the Chinese New Year and summer season this year. Higher contribution from concessions and screen advertising income as well as additional revenue from new cinemas opened in 2013 also contributed to the increase.

Segment profit was RM15 million in 3Q2014 compared with RM11 million in 3Q2013, and for 9M2014, the segment's profit before tax grew by 22% to RM47 million both in line with the growth in revenue.

Environmental engineering, waste management and utilities

The segment registered improved revenue of RM27 million in 3Q2014 and RM80 million for 9M2014, representing increases of 39% and 23% respectively compared with the corresponding periods in 2013, mainly contributed by more on-going projects.

Notwithstanding the revenue growth, the segment recorded a loss of RM0.2 million in 3Q2014 compared with a profit of RM2.7 million in 3Q2013. The loss for the quarter is a one-off event and it relates to rectification works to complete a project. For 9M2014, a lower profit of RM0.8 million was registered compared with RM5.6 million for 9M2013. The higher profit in 9M2013 was mainly due to the exceptional profit recognised from the completion of a project.

Property investment and development

The higher segment revenue of RM23 million in 3Q2014 was primarily from progress billings recognised from property sales. Segment revenue for 9M2014 increased by 34% to RM71 million mainly from revenue recognition upon delivery of vacant possession of Masera bungalows in Bukit Segar, Kuala Lumpur and progress billings from properties sold in Taman Tanah Aman, Seberang Prai. Higher rental rates from renewal of tenancies also contributed to the improved segment revenue in 9M2014.

In 3Q2014, profit before tax of RM7.1 million was marginally lower compared with RM7.9 million in 3Q2013 mainly due to higher promotional expenses. Profit before tax for 9M2014 was slightly higher at RM24 million compared with RM22 million in 9M2013 due to higher progress billings coupled with the increase in rental income.

Chemicals trading and manufacturing, Livestock farming, Investments in equities and Other operations

The combined revenue from these segments increased by 5% in 3Q2014 to RM125 million and 10% for 9M2014 to RM371 million, largely due to higher revenue generated by the livestock segment. The revenue growth was driven by increased sales volume as well as higher selling prices of day-old-chicks and eggs. Most of the other segments also reported better performance in the quarter and year to-date under review.

Despite the turnaround in the livestock segment as a result of improved selling prices, improved production efficiency and effective cost control, the combined segments collectively reported lower profit of RM3.8 million in 3Q2014 and RM19 million for 9M2014 compared with RM3.9 million in 3Q2013 and RM20 million for 9M2013 respectively. This was partly due to pre-production expenses and start-up cost incurred by the bakery segment on the new chiffon cake line and the new bread line. There was also a one-time gain of RM16 million on disposal of the Group's Tradewinds (M) Berhad shares in March 2013 that contributed to higher profits for 9M2013.

Share of associates and joint venture's profits less losses

The Group's associates and joint venture contributed higher profits of RM257 million in 3Q2014 compared with RM245 million in 3Q2013, of which Wilmar's portion was RM247 million in 3Q2014 against RM245 million in 3Q2013. For 9M2014, the Group's associates and joint venture contributed lower profits of RM462 million compared with RM562 million for 9M2013. Wilmar contributed RM443 million in 9M2014 against RM546 million in 9M2013 due to the continued margin contractions in palm and laurics as well as the negative soybean crushing margins in 1Q2014.

The Group's profit before tax of RM366 million in 3Q2014 was 91% higher than the RM192 million in 2Q2014, with Wilmar contributing higher profits of RM247 million in 3Q2014 compared with RM99 million in the preceding quarter this year. The flour and feed milling, and grains trading segment profits improved primarily due to higher gains on grains trading and significant improvement in foreign exchange translation positions. The property investment and development segment recorded higher profits in 3Q2014 from higher progress billings recognised in the quarter for the Masera bungalows. The film exhibition and distribution segment profit was lower in 3Q2014 compared with 2Q2014 during which the summer blockbuster movies were released. The investments in equities recorded lower dividend income in the quarter under review.

B3. Prospects for current financial year

In Malaysia and Asia generally, domestic demand will remain the key driver of economic growth for this financial year.

The Group's flour and feed milling, consumer products, film exhibition, farm and bakery businesses are expected to perform well and will be supported by stronger domestic consumption during the year-end festive season. The environmental engineering division's on-going projects together with finalisation of completed project accounts will contribute positively in the last financial quarter. The property development division is expected to maintain its contribution to the Group.

While the Group's core businesses are expected to perform well in this financial year; its overall consolidated financial results will continue to be contingent on Wilmar's business performance.
