31 DECEMBER 2014

PPB GROUP BERHAD

2014

TH

QUARTERLY REPORT

From The Desk Of The Chairman

Dear Shareholders,

We are pleased to announce that PPB Group's revenue rose by 12% to RM3.7 billion for year 2014 mainly driven by growth in most of the Group's core segments.

PPB Group posted an unaudited profit before tax of RM1.03 billion for year 2014, down 3% from the year before. The lower profit was due to reduced profit contribution from Wilmar International Limited, lower income from investment in equities and losses in the packaging business reported within "Other Operations". Most of the Group's core segments achieved better results for year 2014.

Profit for the year was RM938.9 million and earnings per share stood at 77.33 sen.

The Board of Directors has recommended a final single tier dividend of 16 sen per share for the financial year ended 31 December 2014 subject to shareholders' approval at the forthcoming Annual General Meeting. The final single tier dividend is payable on 29 May 2015 and together with the interim single tier dividend of 7 sen per share, the total dividend for financial year 2014 would be 23 sen per share compared with 25 sen paid in respect of year 2013.

GOING FORWARD

The performance of the Group's flour, feed and food-related businesses should be sustainable, based on their enlarged distribution channels and market share. The cinema business looks forward to the strong line-up of film releases in 2015 which should drive higher admissions to the existing cinemas as well as new cinemas to be opened in the coming year. The property division is expected to perform satisfactorily despite subdued sentiments in the local property market. The environmental engineering segment should achieve higher revenue in the year as the contracts in hand progress to main construction phases.

Domestic demand will remain as the main driving factor for the Group's core businesses while the overall consolidated financial results in 2015 will continue to be substantially supported by Wilmar's business performance.

HELPING FLOOD VICTIMS

The massive floods that hit the east coast of Peninsular Malaysia and Perak end of December 2014 left many families seeking shelter at relief centres. PPB Group through its 80% subsidiary, FFM Berhad (FFM), was prompt to distribute ready-to-eat items, Massimo cream rolls and Chiffon-in-a-Cup, manufactured and distributed by FFM Group to flood victims at the relief centres.

When the flood waters receded and the residents started to return home, FFM initiated the second phase of their distribution, giving out cleaning products, mosquito sprays as well as heavy duty garbage bags. The house-to-house delivery to flood victims by FFM staff was not an easy task as the roads were muddy and houses were located far apart. The weather too was unpredictable as hot and humid weather could turn into a thunderstorm and heavy downpour in an instant. However, it did not dampen FFM staff spirit as they continued to work, oftentimes in completely drenched condition.

The efforts of FFM staff were rewarded with happy and grateful faces of the recipients. In total, the distribution managed to reach 6,000 families in the east coast states and Perak.

Apart from the contribution from PPB Group, the staff of FFM group voluntarily started a donation drive and collected a total sum of RM72,000 for flood victims and FFM staff who were affected by the floods.

A. Financial Reporting Standard (FRS) 134 - Paragraph 16

A1. Accounting policies

The interim financial statements of the Group have been prepared in accordance with the requirements of Financial Reporting Standards (“FRS”) FRS 134 - Interim Financial Reporting and Chapter 9, Part K of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad (“BMSB”).

The accounting policies and methods of computation used in the preparation of the interim financial statements are consistent with those used in the preparation of the audited financial statements for the financial year ended 31 December 2013 except for the adoption of the following Amendments to FRSs and Issues Committee Interpretations (“IC Interpretation”) that are effective for financial periods beginning on or after 1 January 2014 :-

Amendments to FRS 10, FRS 12 and FRS 127	Investment Entities
Amendments to FRS 132	Offsetting Financial Assets and Financial Liabilities
Amendments to FRS 136	Recoverable Amount Disclosures for Non-Financial Assets
Amendments to FRS 139	Novation of Derivatives and Continuation of Hedge Accounting
IC Interpretation 21	Levies

The adoption of the above Amendments to FRSs and IC Interpretation does not have any significant financial impact on the Group.

Malaysian Financial Reporting Standards (“MFRS”)

On 19 November 2011, the Malaysian Accounting Standards Board (“MASB”) issued a new approved accounting framework, Malaysian Financial Reporting Standards (“MFRS”).

The MFRS framework is to be applied by all entities other than private entities for annual periods beginning on or after 1 January 2012, with the exception of entities subject to the application of MFRS 141 - Agriculture and IC Interpretation 15 - Agreements for Construction of Real Estate, including the entities’ parent, significant investor and venturer (“Transitioning Entities”).

Transitioning Entities are allowed to defer adoption of the MFRS framework and continue to use the existing FRS framework until the MFRS framework is mandated by the MASB.

The Group falls within the definition of Transitioning Entities and has opted to defer adoption of the MFRS framework.

MASB had announced on 2 September 2014 that all Transitioning Entities shall adopt the MFRS framework and prepare their first MFRS financial statements for annual periods beginning on or after 1 January 2017.

The Group will adopt the MFRS framework and will prepare its first set of MFRS financial statements for the financial year ending 31 December 2017. In presenting its first set of MFRS financial statements, the Group will quantify the financial effects arising from the differences between MFRS and the currently applied FRS. The majority of the adjustments required on transition are expected to be made retrospectively, against opening retained earnings of the Group. Accordingly, the financial performance and financial position of the Group as presented in the financial statements for the year ending 31 December 2014 could be different if prepared in accordance with MFRS.

B. BMSB Listing Requirements (Part A of Appendix 9B)

B1. Analysis of performance for the financial period to-date

Group revenue increased by 4% to RM933 million in 4Q2014 compared with RM900 million in 4Q2013, mainly from the flour and feed milling, and grains trading segment. The environmental engineering, waste management and utilities segment also contributed to the higher Group revenue. The increase was partly offset by lower revenue from the property investment and development segment as well as chemicals and investments in the combined segment. For FY2014, group revenue rose by 12% to RM3.70 billion compared with RM3.31 billion for FY2013, driven by growth in most of the Group's core segments.

The Group registered profit before tax of RM296 million in 4Q2014, 6% lower than the RM315 million in 4Q2013. Despite higher profit contribution from an associate, Wilmar International Limited ("Wilmar") in the quarter, lower profits from flour and feed milling, and grains trading segment as well as the loss in the packaging business had reduced the Group profit. For FY2014, Group recorded profit before tax of RM1.03 billion which was 3% lower than the RM1.06 billion for FY2013, mainly due to reduced profit contribution from Wilmar, lower profits from investment in equities and losses in the packaging business reported within "other operations". Most of the Group's core segments achieved better results for the year.

Flour and feed milling, and grains trading

Revenue increased by 9% to RM586 million in 4Q2014 and 14% to RM2.34 billion for FY2014 compared with RM540 million and RM2.05 billion respectively in the corresponding periods last year. Higher flour sales volume in Indonesia, Vietnam and Malaysia coupled with the increased animal feed sales volume contributed to the growth in segment revenue for 4Q2014 and FY2014.

The segment profits were lower at RM16 million in 4Q2014 compared with RM39 million in 4Q2013 mainly due to the net grains hedging position. However, the segment recorded a 44% increase in profit before tax of RM179 million for FY2014 compared with RM124 million a year ago, primarily due to the improved net foreign exchange translation positions, higher sales volume, better recovery of fixed costs and better margins.

Marketing, distribution and manufacturing of consumer products

The segment registered a marginal 3% decrease in revenue to RM101 million in 4Q2014 from a year ago due mainly to termination of distribution of an existing agency product, which revenue reduction was partly cushioned by two new agency products introduced in the same quarter. The enlarged distributorship granted for an agency product since August 2013 contributed to the 9% growth in revenue from RM404 million for FY2013 to RM438 million for FY2014.

Segment profit of RM5.3 million in 4Q2014 was lower than the RM6.7 million in 4Q2013 due to lower revenue generated in the quarter under review. The higher profits earned of RM28 million for FY2014 was in line with the revenue growth as well as higher sales of agency products with better margins.

Film exhibition and distribution

Higher revenue of RM96 million in 4Q2014 and RM371 million for FY2014 represented an increase of 9% and 8% respectively compared with the same periods last year. The growth was from improved cinema collections from blockbuster movies released, higher contribution from concessions and screen advertising income, higher average ticket prices with digitalisation of cinema halls as well as additional revenue from new cinemas opened in 2013 and 2014 collectively contributed to the increase.

Segment profit was RM14 million in 4Q2014 compared with RM11 million in 4Q2013, and for FY2014, the segment's profit before tax grew by 23% to RM61 million; both in line with the growth in revenue.

Environmental engineering, waste management and utilities

The segment registered improved revenue of RM59 million in 4Q2014 and RM139 million for FY2014, representing increases of 69% and 39% respectively compared with the corresponding periods in 2013, mainly contributed by projects secured in 2013 and 2014 which have reached their procurement and construction stages.

In line with the revenue growth in 4Q2014, segment profit for the quarter increased to RM4.5 million from RM1 million in 4Q2013. For FY2014, profit before tax of RM5.3 million was lower compared with RM6.6 million for FY2013 mainly due to the exceptional profit which was recognised from a completed project in 2013 and there was an impairment of goodwill in 2014.

Property investment and development

The segment recorded lower revenue of RM13 million in 4Q2014 compared with RM36 million in 4Q2013 as most of the revenue from progress billings had been recognised in 4Q2013 and 1Q2014 upon delivery of vacant possession of Masera bungalows in Bukit Segar, Kuala Lumpur. For FY2014, lower revenue was recorded at RM84 million compared with RM90 million for FY2013 due to lower project management fees received. The lower segment revenue was mitigated by higher rental income from increased rental rates upon renewal of tenancies and increased occupancy rates.

Segment profits for the quarter increased to RM14 million in 4Q2014 and RM38 million for FY2014 from RM12 million in 4Q2013 and RM34 million for FY2013. This was mainly due to profits recognised from finalisation of accounts for the Masera project, increase in rental income and profit from sale of an investment property.

Chemicals trading and manufacturing, Livestock farming, Investments in equities and Other operations

The combined revenue from these segments decreased by 16% in 4Q2014 to RM113 million from RM134 million in the same quarter last year; largely due to an exceptional dividend income of RM13 million received in 4Q2013 from one of its quoted investments. Chemical trading segment posted lower revenue due to tighter credit control and the significant drop in crude oil prices in 4Q2014 that exacerbated the sales of petroleum-based chemicals as customers adopted a “wait and see” attitude and were buying on need basis. For FY2014, the combined revenue grew marginally at 3% to RM485 million from RM473 million in the previous year, mainly attributed to higher revenue generated by the livestock segment. The revenue growth was driven by increased sales volume as well as higher selling prices of day-old-chicks and eggs.

The combined segments collectively reported a loss of RM17.1 million in 4Q2014 and a profit of RM1 million for FY2014 compared with profits of RM19 million in 4Q2013 and RM39 million for FY2013. While the livestock segment has turned profitable in FY2014 as a result of improved selling prices and improved production efficiency, the combined segment result was reduced by the losses incurred in the packaging business. The profit in FY2013 was lifted by a one-time gain of RM16 million on disposal of the Group's Tradewinds (M) Berhad shares and an exceptional dividend income of RM13 million received from quoted investment.

Share of associates and joint venture's profits less losses

The Group's associates and joint venture contributed higher profits of RM262 million in 4Q2014 compared with RM227 million in 4Q2013, of which Wilmar's contribution was RM252 million in 4Q2014 against RM218 million in 4Q2013. For FY2014, the Group's associates and joint venture contributed lower profits of RM724 million compared with RM790 million for FY2013. Wilmar contributed RM695 million in FY2014 against RM764 million in FY2013 due to the continued margin contractions in palm and laurics as well as the negative soybean crushing margins.

Total profit before tax	295,927	366,266	(70,339)	(19%)

The Group's profit before tax of RM296 million in 4Q2014 was 19% lower than the RM366 million in 3Q2014. The flour and feed milling, and grains trading segment profits decreased primarily due to the net grains hedging position. The combined segment recorded a loss mainly due to losses incurred in the packaging business and the provisions made for the cost of transferring the packaging operation from Malaysia to Myanmar. The consumer products profit decreased due to lower sales while the film exhibition and distribution profit was lower due to higher operating expenses from upgrading of cinema facilities and pre-operating expenses of new cinemas. The property development and investment segment recorded higher profits in 4Q2014 from sale of an investment property and profit recognition from the Masera bungalow project. The environmental engineering, waste management and utilities segment turned around with profit recognised from projects that had reached the procurement and construction stages. Wilmar contributed higher profits of RM252 million in 4Q2014 compared with RM247 million in the preceding quarter this year.

B3. Prospects for current financial year

The Malaysian economy as reported is expected to remain on a steady growth path in the coming year. While consumer sentiment is likely to be cautious in light of the volatile commodity markets and the impending implementation of the Goods and Services Tax, the stable rise in income and employment are expected to support household spending.

The performance of the Group's flour, feed and food-related businesses should be sustainable, based on their enlarged distribution channels and market share. The cinema business looks forward to the strong line-up of film title releases in 2015 which should drive higher admissions to the existing cinemas as well as new cinemas to be opened in the coming year. The property division is expected to perform satisfactorily despite subdued sentiments in the local property market. The environmental engineering segment should achieve higher revenue in the year as the contracts in hand progress to the main construction phases.

Domestic demand will remain as the main driving factor for the Group's core businesses while the overall consolidated financial results in 2015 will continue to be substantially supported by Wilmar's business performance.
