

# From The Desk Of The Chairman

#### Dear Shareholders,

We are pleased to announce that PPB Group's revenue rose by 9% to RM4.05 billion for 2015 mainly due to improved revenue from the *Grains and Agribusiness*; *Film Exhibition and Distribution*; and *Environmental Engineering and Utilities segments*.

PPB Group posted an unaudited profit before tax of RM1.18 billion for the year, up 15% from the year before due mainly to higher profit contribution from the *Grains and Agribusiness* segment in addition to a foreign exchange translation gain on PPB's share of Wilmar's results which are reported in US Dollars, as well as profits from the *Investments and Other Operations* segment.

Profit for the year was RM1.08 billion and earnings per share increased to 88.68 sen.

The Board of Directors has recommended a final single tier dividend of 17 sen per share for the financial year ended 31 December 2015 subject to shareholders' approval at the forthcoming Annual General Meeting. The final dividend is payable on 25 May 2016 and together with the interim single tier dividend of 8 sen per share, the total dividend for financial year 2015 would be 25 sen per share compared with 23 sen paid in respect of year 2014.

#### **GOING FORWARD**

Despite a challenging business environment, management believes that the Group's established market position in the *Grains and Agribusiness* segment as well as the extensive distribution network in the *Consumer Products* segment will help PPB Group to remain resilient in the year ahead. The *Film Exhibition and Distribution* segment should continue to deliver healthy performance from strong movie titles and newly-opened cinemas. The *Environmental Engineering and Utilities* segment is expected to achieve lower revenue in the year, reflecting the current contracts in hand, while property sales are expected to be affected by the weak property market sentiment.

The Group's consolidated financial results will continue to be supported by Wilmar's business performance.

#### **HAPPENINGS**

PPB conducted a full day in-house directors' training session which was attended by close to a hundred directors, senior managers and officers of PPB group companies and affiliates. The content comprised subjects which are topical and relevant to the Group, and aims to keep directors and management abreast with market and regulatory developments, as well as other subjects of interest.

On 17 December 2015, Golden Screen Cinemas (GSC), a wholly-owned subsidiary of PPB, participated in a signing ceremony hosted by the owner of MyTown Shopping Centre with its major tenants. GSC will be setting up a 13-screen cineplex at MyTown Shopping Centre scheduled for opening in 2017.

#### A7. Segmental reporting

#### Changes in Group segmental reporting

The segment reporting structure in the financial reports has been realigned with the Group's internal operating structure. The realignment corresponds to PPB Group's objective to enhance synergy within its core operations and related businesses.

These changes were introduced based on the seven reportable segments described below beginning from financial year 2015. Hence, the interim financial reports are presented with the new segment reporting structure beginning from the first quarter of 2015 with prior periods adjusted accordingly.

#### Grains and agribusiness

This segment includes flour milling and manufacturing of animal feed, wheat and maize trading, production of day-old-chicks, eggs and other related downstream activities, and oil palm plantations.

#### Consumer products

This segment includes marketing and distribution of edible oils and consumer products, production and distribution of frozen food and bakery products, and manufacturing of toilet requisites and household products.

#### Film exhibition and distribution

This segment includes exhibition and distribution of cinematograph films.

#### **Environmental engineering and utilities**

This segment includes construction works specialising in the water and environmental industries and provision of waste management services.

#### Property

This segment includes letting of commercial properties, and development of residential and commercial properties.

#### Investments in equities

This segment includes investments in quoted and unquoted shares.

#### Other operations

This segment includes chemical trading and manufacturing, investment holding, packaging and others.

As part of this realignment, livestock farming and oil palm plantations have been combined into **grains and agribusiness**. The production and distribution of frozen food and bakery products both of which were previously components of other operations are now grouped together under **consumer products**. Chemical trading and manufacturing has been aggregated into **other operations**. The other reportable segments remain the same as per the former grouping. This segmental realignment has no impact on the consolidated segment revenue, profits, assets or liabilities.

#### B. BMSB Listing Requirements (Part A of Appendix 9B)

#### B1. Analysis of performance for the financial period to-date

Group revenue increased by 17% in 4Q2015 to RM1.09 billion as compared to RM993 million in 4Q2014. This was primarily attributed to higher revenue from the Grains and agribusiness, Film exhibition, Environmental engineering and Property segments. Consumer products, Investments and Other operations segments delivered lower revenue in the quarter under review. For FY2015, Group revenue increased by 9% to RM4.05 billion compared with RM3.70 billion for FY2014, primarily due to contribution from improved revenue in the Grains and agribusiness, Film exhibition, Environmental engineering and utilities segments. The Property, Consumer Products and Investments and Other operations segments however generated lower revenue in FY2015.

The Group profit before tax of RM379 million recorded in 4Q2015 was 28% higher compared with RM296 million in 4Q2014. Higher Group profit was mainly due to contribution from the Grains and agribusiness, Investment and Other operations segments, and better results from our associate, Wilmar International Limited ("Wilmar"). For FY2015, the Group registered a 15% increase in profit before tax to RM1.18 billion compared with RM1.03 billion for FY2014, largely due to higher profit contribution from the Grains and agribusiness segment plus a foreign exchange translation gain on PPB's share of Wilmar's results which are reported in US Dollars ("USD"), as well as profits from the Investments and Other operations segments.

#### Grains and agribusiness

Revenue grew by 21% to RM747 million in 4Q2015 compared with RM619 million in the corresponding period last year. For FY2015, segment revenue was up 10% to RM2.71 billion from RM2.47 billion a year ago, mainly driven by higher flour sales volume in Vietnam and Indonesia and increased feed sales volume in Malaysia.

Segment profits improved significantly to RM73 million in 4Q2015 and 33% to RM260 million for FY2015, primarily attributable to net foreign exchange translation gain and improved margins. The feed division also recorded higher profit from sales volume increase and better profit margin as a result of lower raw material costs.

#### **Consumer products**

The segment posted marginally decreased revenue of RM146 million in 4Q2015 compared with the corresponding quarter last year. Revenue for FY2015 dropped marginally from RM600 million last year to RM591 million this year. The lower revenue was due to discontinuance of an agency product and lower revenue from certain agency products.

Lower revenue amid higher staff costs and higher depreciation charge resulted in lower segment profits of RM25 million for FY2015.

#### Notes (Cont'd)

#### Film exhibition and distribution

The segment continued to strengthen with revenue increasing 12% to RM107 million in 4Q2015, and 17% to RM436 million for FY2015 mainly due to contribution from new cinemas and improved cinema collections from blockbuster movie titles released.

In 4Q2015, segment profit was RM15 million compared with RM14 million in 4Q2014 due to higher virtual print fee income offset by lower profit contribution from film distribution. For FY2015, profit grew by 8% from RM61 million to RM66 million mainly from higher cinema exhibition and distribution revenue.

#### Environmental engineering and utilities

Revenue from this segment grew from RM59 million in 4Q2014 to RM78 million in 4Q2015, and from RM139 million for FY2014 to RM255 million for FY2015. The main drivers for the significant improvement in revenue came from the increased number of engineering projects secured and the progressive recognition of the revenue of these projects especially the ones which have been completed or at their final stages of construction.

Segment profit for 4Q2015 of RM2.5 million was lower as compared to the same period last year due to additional profits recognised from a sewage project in 4Q2014. Nevertheless, for FY2015, total profits more than doubled from RM5 million to RM11 million in tandem with the higher revenue delivered in the financial year under review.

#### **Property**

Rental of investment properties was the major contributor to the segment revenue of RM20 million in 4Q2015 and RM65 million for FY2015, both of which decreased marginally due to lower occupancy rates compared to the same periods last year. Property development posted lower revenue from progress billings of bungalow sales in Seberang Perai Tengah compared with FY2014 progress billings on delivery of vacant possession for the Masera bungalows in Kuala Lumpur. Higher fee income generated by project management and marketing activities have helped to cushion the lower segment revenue.

Segment profit was substantially lower at RM5 million in 4Q2015 compared with RM14 million in 4Q2014, partially mitigated by the higher profit from project management and marketing income. For FY2015, lower segment profit of RM25 million was mainly due to lesser progress billings after completion of the Masera bungalow project last year.

#### **Investments and Other operations**

The combined segment revenue decreased by 15% in 4Q2015 to RM31 million and 26% to RM141 million for FY2015 compared with RM36 million in 4Q2014 and RM190 million for FY2014. Revenue from the chemicals trading and manufacturing business for the year was lower compared to FY2014 as management tightened credit control policies. Revenue from the packaging business was lower as expected, after an operational restructuring and production streamlining exercise whereby the packaging operation was relocated from Malaysia to Myanmar. Lesser dividend income received from quoted investments and discontinuance of the shipping business also contributed to the revenue decrease.

The combined segments collectively registered losses of RM3 million and RM22 million in both 4Q2015 and 4Q2014 respectively. For FY2015, the combined segment profit was RM12 million compared with a loss of RM18 million for FY2014. In addition to a gain of RM5.3 million on liquidation of a subsidiary in FY2015, favourable foreign exchange gain from export sales had contributed to higher profits for the chemical trading and manufacturing business, coupled with lower losses incurred by the packaging business.

#### Share of associates and joint venture's profits less losses

The Group's associates and joint venture contributed higher profits of RM280 million in 4Q2015 compared with RM262 million in 4Q2014. Wilmar contributed a higher profit of RM266 million in 4Q2015 against RM252 million in 4Q2014. This was the result of favourable foreign exchange translation of Wilmar's USD-denominated results into Ringgit.

For FY2015, contribution from the associates and joint venture was higher at RM795 million compared with RM724 million for FY2014, of which Wilmar's contribution was RM765 million for FY2015 against RM695 million for FY2014. The foreign exchange translation gain on the Group's share of Wilmar's results has increased profits despite the decrease in Wilmar's FY2015 results on the back of weaker regional currencies against the USD.

| Total profit before tax   | 378,748 | 336,894 | 41,854   | 12%     |

The Group reported a profit before tax of RM379 million in 4Q2015, representing an increase of 12% from RM337 million in 3Q2015.

Wilmar contributed higher profits of RM266 million in 4Q2015 compared with RM205 million in 3Q2015. The lower profits in the Investments and Other operations segment were mainly due to gain on liquidation of a subsidiary in 3Q2015 and comparatively lower dividend income received in 4Q2015.

Profit from the Grains and agribusiness segment decreased to RM73 million in 4Q2015 mainly due to less favourable net foreign exchange translation positions quarter-to-quarter. The Environmental engineering segment had lower profits compared to 3Q2015 due to impairment of goodwill and additional costs accrued for a project, whilst the Property segment earned higher profit from project management and marketing fee income. The Film exhibition and distribution segment recorded higher profit in 4Q2015 due to stronger movies released.

#### B3. Prospects for the next financial year

Bank Negara Malaysia reported that GDP growth in Malaysia for fourth quarter 2015 had moderated to 4.5% from 4.7% in the third quarter, and that the Malaysian economy is expected to expand between 4.0% to 5.0% in 2016. While domestic demand will continue to be the key driver of growth, it is projected that private consumption will moderate as households adjust to the rising cost of living and the impact of a weaker Ringgit.

Despite a challenging environment, management believes that the Group's established market position in the Grains and agribusiness segment as well as the extensive distribution network in the Consumer products segment will help the Group to remain resilient in the year ahead. The cinema business should continue to deliver healthy performance from strong movie title line-ups and newly-opened cinemas. The Environmental engineering segment will achieve lower revenue in the year, reflecting the current contracts in hand, while property sales are expected to be affected by the weak property market sentiment.

The Group's consolidated financial results will continue to be supported by Wilmar's business performance.

The effective tax rate is higher than the average statutory rate for the period/year mainly due to deferred tax credit not recognised by certain foreign subsidiaries. Deferred tax benefit will be recognised when the subsidiary is able to estimate accurately the timing of its future profits.
