From The Desk Of
The Chairman

DEAR SHAREHOLDERS,

We are pleased to announce that PPB Group's revenue increased by 10% to RM3.313 billion for year 2013 mainly due to higher revenue generated from the flour and feed milling; and grains trading segment. With the exception of the environmental engineering segment, most of the other segments delivered higher revenue in 2013.

PPB Group posted an unaudited profit before tax of RM1.079 billion for year 2013, up 18% from the year before. The better profit was due to higher profit contribution from Wilmar International Limited (Wilmar) as well as most of the Group's business segments.

From The Desk Of The Chairman (CONT'D)

In line with the higher profit before tax, profit for the year improved 15% to RM1.003 billion and earnings per share stood at 83.86 sen.

The Board of Directors has recommended a final single tier dividend of 17 sen per share for the financial year ended 31 December 2013 subject to shareholders' approval at the forthcoming Annual General Meeting. The final single tier dividend is payable on 6 June 2014 and together with the interim single tier dividend of 8 sen per share, the total dividend paid and payable for financial year 2013 would be 25 sen per share compared with 20 sen paid in respect of year 2012.

Going Forward

PPB Group's business have performed well in 2013 on the back of strong domestic consumption, supported by the Group's increased production and distribution capacities, as well as new cinemas.

With the Group's strong core business presence in Malaysia together with expansion in the cinema, flour and bakery segments, it is anticipated that the Group's businesses will continue to perform well in 2014. The Group's regional businesses are also expected to grow in line with the expanded flour milling capacity; sustained by increasing affluence and domestic consumption in those markets.

In addition to its operating businesses, the Group's overall consolidated financial results in 2014 will continue to be substantially supported by Wilmar's business performance.

B. BMSB Listing Requirements (Part A of Appendix 9B)
B1. Analysis of performance for the financial period to-date

Group revenue increased by 15% to RM900 million in 4Q2013 and 10% to RM3.3 billion for FY2013, compared with RM783 million in 4Q2012 and RM3 billion for FY2012. This was primarily attributed to higher revenue from the flour and feed milling, and grains trading segment. With the exception of the environmental engineering segment, most of the other segments delivered higher revenue in the quarter and financial year under review.

The Group profit before tax of RM315 million recorded in 4Q2013 was 5% lower compared with RM331 million in 4Q2012. This was mainly due to lower profit contribution from an associate, Wilmar International Limited (“Wilmar”) and lesser profits from the flour and feed milling, and grains trading segment which was partially offset by better performance from the property and livestock segments. For FY2013, the Group achieved an 18% increase in profit before tax to RM1.1 billion compared with RM917 million for FY2012, attributed to higher profit contribution from Wilmar as well as most of the Group’s business segments.

Flour and feed milling, and grains trading

Revenue rose 13% to RM540 million in 4Q2013 and 11% to RM2.1 billion for FY2013, compared with RM477 million and RM1.8 billion respectively in the corresponding quarter and period last year. This was mainly attributed to higher sales volume and improved selling prices of flour and feed.

The segment delivered lower profits of RM39 million in 4Q2013 compared with RM53 million in 4Q2012. The higher sales volume coupled with lower raw material costs resulted in better margins. However, this was negated by less favourable grains trading conditions in the 4th quarter. For FY2013, segment profit was up modestly by 2% from RM122 million to RM124 million. Better performance in grains trading mitigated the lower margins due to higher raw material costs and unfavourable foreign currency exchange results.

Marketing, distribution and manufacturing of consumer products

The segment revenue continued to grow mainly driven by additional sales of an agency product in Peninsular Malaysia and improved sales from the other existing agency products. Segment revenue grew by 11% to RM105 million and 4% to RM404 million in 4Q2013 and FY2013 respectively.

Segment profit was also up 14% to RM6.7 million in 4Q2013 and 22% to RM24 million in FY2013, in line with the higher revenue and improved sales of agency products with better margins.

Film exhibition and distribution

Film exhibition delivered a strong revenue growth of 13% to RM88 million in 4Q2013 and 18% to RM342 million for FY2013, led by the new cinemas opened in 2012 and 1H2013 coupled with more blockbuster movies released. Higher revenues were also recorded by the film distribution and screen advertising businesses.

Despite higher revenue reported in 4Q2013, the segment profit of RM11 million was slightly lower than that of the corresponding quarter last year mainly due to digitalisation of the projection system that resulted in a write-off of RM2.4 million of obsolete equipment. Excluding this write-off, the segment registered a higher profit of RM13.3 million in 4Q2013. Growing in tandem with revenue, the segment charted an encouraging performance with profits of RM50 million for the financial year, a jump of 24% from last year.

Environmental engineering, waste management and utilities

The segment reported lower revenue of RM35 million in 4Q2013 and RM100 million for FY2013 compared with RM49 million in 4Q2012 and RM155 million for FY2012 respectively. This was mainly due to several on-going environmental engineering projects being at completion stage in the quarter and financial year under review, whereby the revenue contribution had been progressively recognised in previous periods.

This segment posted profit of RM1 million in 4Q2013 compared with loss of RM0.5 million in the corresponding quarter last year. The loss in 4Q2012 was mainly due to an additional cost of RM1.5 million accrued in that quarter for rectification works on a completed project. For FY2013, the segment profit of RM7 million compared with RM9 million for FY2012 which was in line with the revenue reported for the financial year. The newly-secured projects in 2013 have yet to contribute significantly in FY2013.

Property investment and development

Segment revenue increased to RM36 million in 4Q2013, more than double its contribution from the corresponding quarter last year, mainly attributable to higher progress billings recognised from sales of bungalows in Masera Bukit Segar, Kuala Lumpur. For FY2013, higher project management fees on newly secured projects and higher rental from renewal of tenancies have contributed to the increase in revenue from RM81 million to RM90 million.

The higher segment profit of RM12 million in 4Q2013 was in line with revenue growth. For FY2013, profit was significantly higher compared with last year mainly due to a gain of RM16.8 million from the sale of an investment property. Excluding the gain, the segment profit was RM33 million for FY2013 compared with RM22 million a year ago derived from profit recognised from progress billings, project management fees and rental income.

Chemicals trading and manufacturing, Livestock farming, Investments in equities and Other operations

Combined revenue from these segments achieved an increase of 25% in 4Q2013 to RM134 million and 14% for FY2013 to RM473 million, mainly attributed to higher revenue in the bakery, livestock and investments segments. Revenue growth in the bakery operation was driven by sales increase in all locations arising from the full operation of all distribution centres in 2013. The improved revenue in the livestock segment was largely due to increase in selling prices and quantities of day-old-chicks and eggs. Higher dividend income from the Group's investments in equities had also contributed to the increase in revenue.

The combined segments profits surged to RM19 million in 4Q2013 compared with a loss of RM2.4 million in 4Q2012 mainly attributed to the improved performance of the livestock segment backed by higher sales quantities and selling prices achieved by both breeder and layer farms. For FY2013, profits jumped to RM40 million from a loss of RM16 million largely contributed by the gain on disposal of the Group's investment in Tradewinds (M) Berhad pursuant to a take-over offer, as well as higher dividend income received. The livestock segment recorded improved performance with lower losses mainly due to higher production of eggs and day-old chick prices. Along with the increase in revenue, the bakery segment also reported higher profits.

Share of associates and joint venture's profits less losses

Wilmar contributed a lower profit of RM218 million in 4Q2013 compared with RM254 million in 4Q2012. For FY2013, Wilmar contributed higher profits of RM763 million as compared with RM694 million a year ago. The profit growth was mainly from Wilmar's palm and laurics, oilseeds and grains, consumer products and sugar businesses.

The Group's profit before tax was RM315 million in 4Q2013, a growth of 8% from RM293 million in 3Q2013. This was mainly driven by better performance from the flour and feed milling, and grains trading segment as a result of improved sales. Higher dividend income received from the Group's investment in equities had also contributed to the increased profits. While most of the Group's segments recorded better results, Wilmar contributed lower profits in 4Q2013.

B3. Prospects for the next financial year

PPB Group's business have performed well in 2013 on the back of strong domestic consumption, supported by the Group's increased production and distribution capacities, as well as new cinema locations.

Looking forward in 2014, Malaysia's GDP growth is projected to remain firm while the growth momentum in the ASEAN region is expected to be stable, moderated by the tightening of monetary policy in Indonesia and the political uncertainties in Thailand.

With the Group's strong core business presence in Malaysia together with expansion in the cinema, flour and bakery segments progressively coming on-stream, it is anticipated that the Group's businesses will continue to perform well in 2014. The Group's regional businesses are also expected to grow in line with the expanded flour milling capacity; sustained by increasing affluence and domestic consumption in those markets.

In addition to its operating businesses, the Group's overall consolidated financial results in 2014 will continue to be substantially supported by Wilmar's business performance.
