

PPB GROUP BERHAD

QUARTERLY REPORT 2015

Q3

INVESTOR
UPDATE

From The Desk Of The Chairman

Dear Shareholders,

We are pleased to report that PPB Group revenue grew by 7% to RM1.96 billion in the first half of 2015. The increase was mainly due to improved revenue in the environmental engineering, grains and agribusiness and film exhibition segments.

Group pre-tax profit of RM465 million was 27% higher compared with RM366 million for 1H2014, mainly due to higher profit contribution from our 18.3% associate, Wilmar International Limited (Wilmar).

Profit for the period was RM418 million in 1H2015 as compared to RM326 million recorded in 1H2014. Accordingly, 1H2015 earnings per share increased to 35.05 sen compared with 26.20 sen for 1H2014.

INTERIM DIVIDEND

The Board of Directors has declared an interim single tier dividend of 8 sen per share for the financial year ending 31 December 2015, payable on 28 September 2015 to shareholders whose names appear in the Record of Depositors on 10 September 2015.

HAPPENINGS

PPB held its 46th Annual General Meeting at Shangri-La Hotel, Kuala Lumpur on 13 May 2015. At the meeting, shareholders were briefed on the Group's performance and financial results for the year ended 31 December 2014.

Vietnam Flour Mills Ltd (VFM), a wholly-owned subsidiary of FFM, will be setting up another 500-mt per day flour mill at its existing Vung Tau premises in South Vietnam at a budgeted cost of USD16.2 million. The mill which is targeted to complete in early 2017 will help VFM strengthen its position as one of the leading flour millers in Vietnam.

Golden Screen Cinemas Sdn Bhd, a wholly-owned subsidiary of PPB, opened its 32nd location at Klang Parade, Klang on 11 June 2015 with 8 screens and a seating capacity of 1,323. GSC Klang Parade is disabled-friendly complete with 16 wheelchair spaces and a lift for easy access to the halls.

Southern Marina Development Sdn Bhd in which PPB has 28% effective interest, officially launched its Southern Marina Residences, the first phase of a 12.5-acre freehold integrated waterfront development in Puteri Harbour on 27 June 2015. The project was launched with the opening of the Southern Marina Puteri Harbour Sales Gallery and Show Units at the site.

CSR ACTIVITIES

During the quarter under review, PPB Group organised several CSR activities for the community. A blood donation campaign in collaboration with the Samye Buddhist Association was held on 26 April 2015 at Cheras LeisureMall, a shopping mall owned and operated by PPB. The campaign attracted more than 200 people and collected 160 bags of blood. The Mall was again the official venue sponsor of the 15th Eagle Cup Judo Championship. The event which attracted a total of 13 schools and judo clubs, creates greater awareness of the sport to the community at large and enables young participants to showcase their skills in a healthy sporting activity.

In honor and appreciation of mothers, Massimo's "Chiffon in a Cup", the cake range produced by The Italian Baker Sdn Bhd, a wholly-owned subsidiary of FFM, successfully organised a fun-filled "Love You Mom" campaign at the One Utama Shopping Centre from 6 to 10 May 2015 to encourage the public to express their love for their mothers.

From The Desk Of The Chairman (Cont'd)

As part of the Group's activities for employees to exercise and stay healthy, 13 PPB staff participated in the 5KM Colour My Heart Run and 12KM Live Great Run held at Dataran Merdeka on 24 May 2015.

A diabetes prevention seminar was organised on 27 May 2015 at FFM's office in Sungai Buloh to keep the staff abreast on tips to prevent diabetes. A total of 30 employees attended the seminar facilitated by Dr Zarina Anuar from the Ramsay Sime Darby Parkcity Medical Centre. Apart from the awareness talk, 100 employees were given complimentary health screening.

On 6 June 2015, PPB organised its first outdoors family day, themed "Love Nature Together". The event was held at the Kota Damansara Community Forest Reserve (KDCF), the first urban forest reserve in Petaling Jaya and brought together a total of 370 PPB Group staff and their families to enjoy some nature-based outdoor activities in a forest environment. The event was also to mark the launch of the Unity Trail, a forest trail sponsored by PPB measuring 2.2 km in length, suitable for trekking and mountain biking.

GOING FORWARD

As consumers continue to adjust to the introduction of GST, stable labour market conditions would support household spending. Management is confident that the Group's consumer products, grains and agribusiness results will remain positive despite the soft market. Cinema admissions will continue to be driven by strong movie title releases and the newly-opened cinemas. The environmental engineering segment should achieve higher revenue in line with the construction progress of contracts in hand. Property sales are expected to be weak for the rest of the year as the local property market goes through challenging times.

Overall, the Group anticipates to achieve similar performance in the second half of the year while the consolidated financial results in 2015 will continue to be substantially supported by Wilmar's business performance.

Happy Malaysia Day to all Malaysians!

Tan Sri Datuk Oh Siew Nam
CHAIRMAN

EXPANSION OF FLOUR MILL IN SOUTH VIETNAM

Vietnam Flour Mills Ltd (“VFM”), a 100%-owned subsidiary of FFM Berhad, is setting up another 500-mt wheat per day flour mill at its existing Vung Tau premises in South Vietnam.

Flour mills in southern Vietnam are going through a consolidation phase with changes seen in flour supplies to some major users. Several smaller mills are also weakening, with some subject to acquisition by bigger players. VFM management envisage an opportunity for VFM to strengthen its position in the market and be one of the leading players. With the current mill running at full capacity, and the Group’s mill in northern Vietnam expected to reach full capacity by 2016, VFM has to double up its milling capacity to be ready to capture such opportunities.

The expansion cost is budgeted at USD16.186 million, and is targeted to be completed in early 2017.

A7. Segmental reporting Changes in Group segmental reporting

The segment reporting structure in the financial reports has been realigned with the Group's internal operating structure. The realignment corresponds to PPB Group's objective to enhance synergy within its core operations and related businesses.

The Group has introduced these changes based on the seven reportable segments described below beginning from financial year 2015. Hence, the Group has presented the interim financial reports with the new segment reporting structure beginning from the first quarter of 2015 with prior periods adjusted accordingly.

Grains and agribusiness

This segment includes flour milling and manufacturing of animal feed, wheat and maize trading, production of day-old-chicks, eggs and other related downstream activities, and oil palm plantations.

Consumer products

This segment includes marketing and distribution of edible oils and consumer products, production and distribution of frozen food and bakery products, and manufacturing of toilet requisites and household products.

Film exhibition and distribution

This segment includes exhibition and distribution of cinematograph films.

Environmental engineering and utilities

This segment includes construction works specialising in the water and environmental industries and provision of waste management services.

Property

This segment includes letting of commercial properties, and development of residential and commercial properties.

Investments in equities

This segment includes investments in quoted and unquoted shares.

Other operations

This segment includes chemical trading and manufacturing, investment holding, packaging and others.

As part of this realignment, livestock farming and oil palm plantations have been combined into **grains and agribusiness**. The production and distribution of frozen food and bakery products both of which were previously components of other operations are now grouped together with **consumer products**. Chemical trading and manufacturing has been aggregated into **other operations**. The other reportable segments remain the same as per the former grouping. This segmental realignment has no impact on the consolidated segment revenue, profits, assets or liabilities.

B. **BMSB Listing Requirements (Part A of Appendix 9B)**

B1. **Analysis of performance for the financial period to-date**

Group revenue grew marginally by 3% in 2Q2015 to RM986 million from RM957 million in 2Q2014 contributed by higher turnover in the film exhibition segment. For 1H2015, Group revenue increased by 7% to RM1.96 billion compared with RM1.84 billion in 1H2014, primarily driven by improved revenue in the environmental engineering, grains and agribusiness, and film exhibition segments. The property, consumer products and investments and other operations segments however generated lower revenue in 1H2015.

Group profit before tax of RM199 million in 2Q2015 was up modestly by 3% compared with RM192 million in 2Q2014. For 1H2015, Group profit before tax improved 27% to RM465 million compared with RM366 million for 1H2014 with the increase mainly contributed by an associate, Wilmar International Limited ("Wilmar"). Better performance in the film exhibition and distribution, grains and agribusiness, and the environmental engineering segments cushioned the lower contributions from the property and consumer products segments.

Grains and agribusiness

Revenue decreased marginally by 1% to RM649 million in 2Q2015 compared with RM653 million in the corresponding period last year, mainly due to lower selling prices of flour in Indonesia despite the increased volume, due to intense competition. The higher animal feed sales volume however mitigated the reduced revenue in the quarter. For 1H2015, the segment delivered improved revenue of RM1.29 billion compared with RM1.23 billion in 1H2014, riding on higher animal feed and maize sales volumes, increased flour sales volume in Vietnam and improved flour selling prices in Malaysia.

Segment profit was down by 63% to RM20 million in 2Q2015 compared with RM54 million in 2Q2014. This was mainly caused by losses suffered in the flour operations in Indonesia due to lower selling prices and intense competition. For 1H2015, the segment profit was slightly higher at RM100 million compared with RM96 million for 1H2014, mainly from improved foreign exchange translation positions and more favourable raw material costs. The livestock farming business and Indonesian flour mill incurred losses in 1H2015 due to difficult operating environments.

Consumer products

The segment registered a 3% increase in revenue to RM157 million in 2Q2015 compared with the same quarter last year, mainly driven by sales of "Chiffon in a Cup" and improved selling prices. For 1H2015, segment revenue of RM301 million achieved was broadly the same as 1H2014. The opening of new distribution centres for bakery products in 3Q2014 contributed to the increase in the segment revenue for 1H2015. The revenue growth was however negated by lower revenue generated from agency products.

Quarterly Report

Notes (Cont'd)

In 2Q2015 and 1H2015, segment profits were lower at RM7.6 million and RM11.8 million respectively compared with the corresponding quarter and period last year. Higher advertisement, promotional and selling expenses resulted in lower profitability for the segment.

Film exhibition and distribution

The segment continued its strong performance with revenue growth of 28% to RM118 million in 2Q2015 and 21% to RM224 million for 1H2015 compared with the corresponding quarter and period last year. Higher revenue was mainly contributed by the six new cinemas and summer blockbuster movies titles released.

In line with revenue growth, the segment profits were up by 14%, both in 2Q2015 and 1H2015 to RM21 million and RM37 million respectively.

Environmental engineering and utilities

In 2Q2015, this segment delivered significant higher revenue of RM46 million compared with RM28 million in 2Q2014 and RM121 million for 1H2015 compared with RM53 million for 1H2014. This was mainly attributed to the increase in the number of on-going engineering projects, as well as revenues being progressively recognised from the raw water supply project and most of the sewage projects being at the construction stages.

Growing in tandem with higher revenue, segment profit improved to RM1.8 million in 2Q2015 from RM0.6 million in 2Q2014 and RM4.6 million for 1H2015 from RM1 million for 1H2014.

Property

Rental of investment properties and project management fees were the major contributors to the segment revenue of RM16 million in 2Q2015 and RM30 million for 1H2015. While rental income increased during the period from renewal of tenancies and the project management activities billed higher fees, property development progress billings decreased in 1H2015. The current billings from bungalow sales in Seberang Perai Tengah are of lesser values compared with the billings in 1H2014 on delivery of vacant possession of the Masera bungalows in Kuala Lumpur.

Segment profit was RM6.1 million in 2Q2015 compared with RM5.8 million in 2Q2014. For 1H2015, the lower profit earned of RM12.9 million was due to lesser progress billings after completion of the Masera bungalows last year.

Investments and Other operations

The combined segment revenue decreased by 24% in 2Q2015 to RM42 million and 26% to RM77 million for 1H2015 compared with RM55 million in 2Q2014 and RM105 million for 1H2014. Lower revenue was generated from the chemicals trading and manufacturing business as management tightened credit control policies and streamlined sales in response to the challenging operating environment. Following the relocation of packaging production facilities from Malaysia to Myanmar, the division's revenue declined in line with its business restructuring and production streamlining programme. Contribution from the shipping business has discontinued with the disposal of the ship while dividend income received from quoted investments was lower in the quarter and period under review.

The combined segments collectively registered profits of RM8.1 million in 2Q2015 compared with RM5.5 million in 2Q2014 and RM5.9 million for 1H2015 compared with RM5.0 million for 1H2014. This was largely attributed to lower raw material costs and favourable foreign exchange transactions from export sales in the chemicals trading and manufacturing division. The segment's profits were partly reduced by lower dividends received from investments in equities and the relocation costs incurred in the packaging business.

Share of associates and joint venture's profits less losses

The Group's associates and joint venture contributed higher profits of RM138 million in 2Q2015 compared with RM104 million in 2Q2014 and RM302 million for 1H2015 compared with RM205 million for 1H2014. Wilmar contributed higher profits of RM135 million in 2Q2015 against RM99 million in 2Q2014 and RM294 million for 1H2015 against RM196 million for 1H2014 mainly due to strong performance from its oilseeds and grains segment, lower foreign exchange losses from shareholders loans and improved performance from its investment securities.

Total profit before tax	198,939	266,541	(67,602)	(25%)

The Group reported a profit before tax of RM199 million in 2Q2015, representing a decrease of 25% from RM266 million in 1Q2015.

Profit from the grains and agribusiness segment reduced to RM20 million in 2Q2015 compared to RM80 million in 1Q2015 due to unfavourable foreign exchange translation positions, raw material price movements and reduced farm product prices. The film exhibition segment enjoyed higher box office takings that were contributed by new cinemas opened in 1H2015 and strong summer blockbuster movies released in the second quarter. Pre-festive season purchases by customers had boosted sales in the consumer products segment in 2Q2015.

The environmental engineering and utilities segment had lower progress billings in 2Q2015 whilst the property segment earned lesser profit in 2Q2015 as there was a net gain on disposal of investment properties in 1Q2015. The combined segment performed better mainly from higher dividend income received in 2Q2015 and the turnaround in the packaging division. With the relocation of the packaging operations from Malaysia to Myanmar, the division generated a small profit as the one-off relocation costs had been accounted for in the preceding quarters.

B3. Prospects for the current financial year

Bank Negara Malaysia has reported that GDP growth in Malaysia had moderated to 4.9% in the second quarter of 2015 from a 5.6% expansion in the first quarter of 2015. Domestic consumer and business sentiments have turned cautious in view of higher prices of food and consumer goods following the implementation of the Goods and Services Tax ("GST"), and the effect of the weakening Ringgit.

As consumers continue to adjust to the introduction of GST, stable labour market conditions would support household spending. Management is confident that the Group's consumer products, grains and agribusiness results will remain positive despite the soft market. Cinema admissions will continue to be driven by strong movie title releases and the newly-opened cinemas. The environmental engineering segment should achieve higher revenue in line with the construction progress of contracts in hand. Property sales are expected to be weak for the rest of the year as the local property market goes through challenging times.

Overall, the Group anticipates to achieve similar performance in the second half of the year while the consolidated financial results in 2015 will continue to be substantially supported by Wilmar's business performance.
